No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Score

A; Note: article in Japanese
C; Comment: The HMW kininogen precursor is produced from the same gene as the LMW form C; Comment: Kininogen is a cysteine proteinase inhibitor, takes part in initiation of C; Comment: The glycine/histidine/lysine-rich region of HMW kininogen light chain is i C; Comment: Bradykinin, released from kininogen by kallikrein, is a potent vasodilator xyproline residue is present in the kininogen prior to the release of bradykinin.
C; Superfamily: kininogen; cystatin homology
C; Keywords: alternative splicing; blood coagulation; cysteine proteinase inhibitor; d F; 1-18 / Domain: signal sequence #status predicted <SIG>
